What We Need for Complete Coverage

To create a comprehensive NPC template system matching DMG Chapter 4 quality, we need:

Immediate Priorities

1. **Official DMG stat blocks** - Retrieve the actual pre-built templates from DMG Chapter 4
2. **Spellcaster templates** - Clerics, Druids, Sorcerers, Wizards with spell selections at each level
3. **Complete feat progressions** - For all 11 PC classes at standard levels (1, 5, 10, 15, 20)
4. **Equipment progressions** - Logical equipment scaling for each class type at each level

Secondary Priorities

1. Skill point allocations by class
 2. Multiclass examples
 3. Class-specific tactics/strategies
 4. Sample NPCs at CR ratings (not just levels)
-

Recommendation

Status: Additional Research Required

The current research file is an excellent rules reference and foundation, but **it does not contain the actual pre-built leveled stat blocks from DMG Chapter 4.**

To complete the NPC template system, we should:

1. **Obtain official DMG Chapter 4 stat blocks** directly (if available in accessible sources)
2. **Create comprehensive templates** for all 11 PC classes at levels 1, 5, 10, 15, 20
3. **Include specific spell selections** for each spellcasting class
4. **Document feat progressions** with rationale for each choice
5. **Provide equipment loadouts** at each level based on Character Wealth by Level

The three example stat blocks in the research file demonstrate good quality—additional templates should follow this same format and level of detail.
