1. Summary Statistics & Overview

Complete inventory of 32 undead creatures classified by intelligence for AI behavior design

32

TOTAL UNDEAD

18

MINDLESS
(INT —)

4

LOW INT
(3–6)

5

AVERAGE INT
(7–12)

5

HIGH INT
(13–18)

Intelligence Tier Distribution

Tier	INT Range	Count	CR Range	AI Profiles Used
Mindless	— (No Score)	18	1/3 – 4	UndeadMindless
Low Intelligence	INT 3–6	4	3 – 8	Humanoid (→ upgrade recommended)
Average Intelligence	INT 7–12	5	3 – 8	Grappler Humanoid Undead
High Intelligence	INT 13–18	5	1 – 7	Humanoid (→ upgrade recommended)

Wisdom Score Distribution

WIS Score	Count	Undead Creatures
10	19	All Zombies, All Skeletons, Mohrg, custom variants (Skeleton Warrior/Archer, Zombie)
11	1	Allip
12	3	Bodak, Greater Shadow, Shadow
13	3	Vampire Spawn, Wight, Wight Dreadwalker
14	6	Ghast, Ghost, Ghoul, Mummy, Spectre, Wraith

AI Profile Distribution (Current)

AI Profile	Count	Status	Undead Using It
UndeadMindless	18	✓ Correct	All Zombies (7), All Skeletons (8), Skeleton Warrior, Skeleton Archer, Zombie
Humanoid	12	⚠ Upgrade	Allip, Bodak, Ghast, Ghost, Ghoul, Greater Shadow, Mummy, Shadow, Spectre, Vampire Spawn, Wight Dreadwalker, Wraith
Undead	1	✓ Correct	Wight
Grappler	1	✓ Correct	Mohrg (Improved Grab)

⚠ **Profile Upgrade Required:** 12 creatures currently use the generic `Humanoid` profile. Based on ability analysis, these should be split into `UndeadIncorporeal`, `UndeadTactical`, and `UndeadBrute` profiles. See Section 7 for full recommendations.

2. Mindless Undead (INT —)

18 creatures | CR 1/3 – 4 | AI Profile: UndeadMindless

No intelligence at all. Operates on pure necromantic animation. Cannot think, plan, or adapt. Attacks nearest target with no tactical awareness. Zombies are limited to single actions per round; Skeletons benefit from Improved Initiative.

Zombie Templates

Factory-generated via `ZombieTemplate.cs`. All share the same core abilities: **Single Actions Only**, **DR 5/slashing**, and **Undead Traits**. HP is calculated as (HD × 8) + Constitution modifier (Undead have no Con score — HP = HD × 8 + 0).

Name	CR	INT	WIS	HD	HP (avg)	AI Profile	Notable Abilities
Human Commoner Zombie	1/2	—	10	2d12	13	UndeadMindless	Single Action DR 5/slashing Undead Traits
Human Warrior Zombie	1/2	—	10	2d12	13	UndeadMindless	Single Action DR 5/slashing Undead Traits
Troglodyte Zombie	1	—	10	4d12	26	UndeadMindless	Single Action DR 5/slashing Undead Traits
Bugbear Zombie	2	—	10	6d12	39	UndeadMindless	Single Action DR 5/slashing Undead Traits
Ogre Zombie	3	—	10	8d12	52	UndeadMindless	Single Action DR 5/slashing Undead Traits
Owlbear Zombie	3	—	10	10d12	65	UndeadMindless	Single Action DR 5/slashing Undead Traits
Minotaur Zombie	4	—	10	12d12	78	UndeadMindless	Single Action DR 5/slashing Undead Traits

Skeleton Templates

Factory-generated via `SkeletonTemplate.cs`. All share: **DR 5/bludgeoning**, **Improved Initiative (bonus feat)**, and **Undead Traits**. Skeletons are not restricted to single actions — they act at full speed.

Name	CR	INT	WIS	HD	HP (avg)	AI Profile	Notable Abilities
Human Archer Skeleton	1/3	—	10	1d12	6	UndeadMindless	DR 5/bludgeon Improved Init
Human Warrior Skeleton	1/3	—	10	1d12	6	UndeadMindless	DR 5/bludgeon Improved Init
Wolf Skeleton	1	—	10	2d12	13	UndeadMindless	DR 5/bludgeon Improved Init

Heavy Warhorse Skeleton	2	—	10	4d12	26	UndeadMindless	DR 5/bludgeon	Improved Init
Owlbear Skeleton	2	—	10	5d12	32	UndeadMindless	DR 5/bludgeon	Improved Init
Minotaur Skeleton	3	—	10	6d12	39	UndeadMindless	DR 5/bludgeon	Improved Init
Troll Skeleton	3	—	10	6d12	39	UndeadMindless	DR 5/bludgeon	Improved Init
Megaraptor Skeleton	4	—	10	8d12	52	UndeadMindless	DR 5/bludgeon	Improved Init

Standard Undead (Custom Variants)

Defined in `NPCDatabaseCustom.cs`. These are the archetypical encounter-ready units with predefined AI behavior roles.

Name	INT	WIS	AI Profile	AI Behavior Role
Skeleton Archer	—	10	UndeadMindless	RangedKiter — maintains distance, targets nearest
Skeleton Warrior	—	10	UndeadMindless	DefensiveMelee — front-line, absorbs hits
Zombie	—	10	UndeadMindless	Shamble toward nearest target, single action restriction

AI Behavior: UndeadMindless

- **Target Selection:** Attack nearest enemy — no prioritization whatsoever
- **Movement:** Move directly toward closest target; no flanking, no tactical positioning
- **Special Abilities:** Triggered automatically (slam attack) — no decision making
- **Retreat:** Never retreats — fights until destroyed
- **Group Tactics:** None — each creature acts independently
- **Zombies only:** Single standard action per round (move OR attack, not both)
- **Skeletons only:** Full actions; benefit from Improved Initiative (+4 to initiative rolls)

3. Low Intelligence (INT 3–6)

4 creatures | CR 3 – 8 | Current: Humanoid | Recommended: UndeadIncorporeal / UndeadBrute

Simple tactics. Can follow basic orders, use simple weapons, and recognize obvious threats. Limited problem-solving ability. May withdraw if severely damaged (<25% HP). Basic target preference toward wounded or isolated enemies.

Creature Entries

Shadow						CR 3 Source: NPCDatabase_S.cs
INT 6	WIS 12	HD 3d12	HP (AVG) 19	CURRENT PROFILE Humanoid	RECOMMENDED UndeadIncorporeal	
SPECIAL ABILITIES						
Incorporeal Turn Resistance +2 Strength Damage Undead Traits						
AI Note: Incorporeal movement allows passage through walls for flanking. Strength damage targeting should prioritize STR-dependent melee characters. Turn Resistance +2 is passive.						

Mummy						CR 5 Source: NPCDatabase_M.cs
INT 6	WIS 14	HD 8d12	HP (AVG) 52	CURRENT PROFILE Humanoid	RECOMMENDED UndeadBrute	
SPECIAL ABILITIES						
Despair (Aura) Mummy Rot (Disease) Disease DR 5/— Undead Traits						
AI Note: Despair aura activates passively — advance into melee to trigger against clustered enemies. Mummy Rot stacks with Despair for compounding debuffs. Low INT limits tactical flexibility.						

Bodak						CR 8 Source: NPCDatabase_B.cs
INT 6	WIS 12	HD 9d12	HP (AVG) 58	CURRENT PROFILE Humanoid	RECOMMENDED UndeadBrute	
SPECIAL ABILITIES						
Death Gaze (30 ft) Immunity to Fire Daylight Vulnerability Undead Traits						
AI Note: Death Gaze should trigger against all visible targets per round — position to maximize facing coverage. Avoid direct sunlight (take damage). Low INT despite high CR.						

Greater Shadow

CR 8 | Source: NPCDatabase_G.cs

INT	WIS	HD	HP (AVG)	CURRENT PROFILE	RECOMMENDED
6	12	9d12	58	Humanoid	UndeadIncorporeal

SPECIAL ABILITIES

Incorporeal

Create Spawn

Turn Resistance +2

Strength Damage

Undead Traits

AI Note: Create Spawn awareness needed — avoid overkilling targets that would spawn useful Shadow minions. Incorporeal movement and Strength Damage targeting same as Shadow.

 **AI Behavior: Low Intelligence Undead**

- **Target Selection:** Prefer wounded or isolated targets over healthy grouped enemies
- **Movement:** Basic tactical positioning; may circle around obstacles
- **Special Abilities:** Used with basic awareness (Death Gaze against visible targets; Despair aura passive)
- **Retreat:** May withdraw if severely damaged (<25% HP)
- **Group Tactics:** Basic swarming — multiple creatures focus same target

4. Average Intelligence (INT 7–12)

5 creatures | CR 3 – 8 | Current: Grappler / Humanoid / Undead | Recommended: UndeadIncorporeal / UndeadTactical / Grappler

Human-like reasoning. Can use tactics, set ambushes, coordinate with allies, and make situational decisions. Will retreat to reposition or lure enemies. Prioritizes spellcasters and weakened enemies. Can coordinate — one grapples while others attack.

Creature Entries

Allip						CR 3 Source: NPCDatabase_A.cs
INT 11	WIS 11	HD 4d12	HP (AVG) 26	CURRENT PROFILE Humanoid	RECOMMENDED UndeadIncorporeal	
SPECIAL ABILITIES						
Incorporeal Babble (AoE Madness) Wisdom Drain Undead Traits						
AI Note: Babble has AoE effect — needs positioning to maximize affected targets each round. Wisdom Drain targets should be prioritized for compounding mental debilitation. Incorporeal gives excellent mobility.						

Wight						CR 3 Source: NPCDatabase_W.cs
INT 11	WIS 13	HD 4d12	HP (AVG) 26	CURRENT PROFILE Undead	RECOMMENDED UndeadTactical	
SPECIAL ABILITIES						
Energy Drain Create Spawn Undead Traits						
AI Note: Energy Drain on high-level targets maximizes negative level impact. Create Spawn — manage kill decisions (don't waste spawns on low-value targets). Coordinate with pack.						

Ghost						CR 7 Source: NPCDatabase_G.cs
INT 12	WIS 14	HD 7d12	HP (AVG) 45	CURRENT PROFILE Humanoid	RECOMMENDED UndeadIncorporeal	
SPECIAL ABILITIES						
Incorporeal Energy Drain Manifestation (toggle) Frightful Moan (AoE Fear) Corrupting Touch Rejuvenation Turn Resistance +4						
AI Note: Most complex AI in this tier. Use Frightful Moan as opener before engaging. Toggle Manifestation to avoid damage (ethereal/material switch). Energy Drain on highest-level targets. Rejuvenation means permanent kill requires special conditions.						

Mohrg

CR 8 | Source: NPCDatabase_M.cs

INT	WIS	HD	HP (AVG)	CURRENT PROFILE	RECOMMENDED
11	10	14d12	91	Grappler	Grappler ✓

SPECIAL ABILITIES

Improved GrabParalysis (tongue)Create SpawnUndead Traits

AI Note: ✓ Profile already correct. Grapple then use tongue paralysis — can then deliver coup de grâce or continue grapple. Create Spawn from paralyzed targets. Cycle between targets to paralyze multiple enemies.

Wight Dreadwalker

CR — (Custom) | Source: NPCDatabaseCustom.cs

INT	WIS	HD	CURRENT PROFILE	RECOMMENDED
11	13	Enhanced	Humanoid	UndeadTactical

SPECIAL ABILITIES

Energy DrainCreate SpawnEnhanced Wight Variant

AI Note: Enhanced Wight with coordinated Energy Drain tactics. Use with standard Wights for multi-drain coordination. Create Spawn adds battlefield control layer.

 AI Behavior: Average Intelligence Undead

- Target Selection:** Prioritize spellcasters and weakened enemies
- Movement:** Seek flanking positions; avoid Attacks of Opportunity when possible
- Special Abilities:** Tactical use — Energy Drain on high-value targets, Create Spawn on isolated enemies
- Retreat:** Will retreat to reposition or lure enemies into traps
- Group Tactics:** Coordinate attacks; one grapples while others attack

5. High Intelligence (INT 13–18)

5 creatures | CR 1 – 7 | Current: Humanoid | Recommended: UndeadTactical / UndeadIncorporeal

Very smart. Uses advanced tactics, leverages special abilities strategically, and can plan multi-step approaches. Analyzes party composition, targets healers and casters first. Uses incorporeal movement through walls, coordinates with minions, and employs hit-and-run tactics.

Creature Entries

Ghoul						CR 1 Source: NPCDatabase_G.cs
INT 13	WIS 14	HD 2d12	HP (AVG) 13	CURRENT PROFILE Humanoid	RECOMMENDED UndeadTactical	
SPECIAL ABILITIES						
Paralysis (touch) Disease Turn Resistance +2 Undead Traits						
AI Note: High INT for a CR 1 creature — paralyze one target, then cycle to next for mass paralysis. Coup de grâce paralyzed targets. Coordinate with pack: multiple ghouls paralyze, then pile on helpless enemies.						

Ghast						CR 3 Source: NPCDatabase_G.cs
INT 13	WIS 14	HD 4d12	HP (AVG) 26	CURRENT PROFILE Humanoid	RECOMMENDED UndeadTactical	
SPECIAL ABILITIES						
Paralysis (touch) Disease Stench (Aura) Turn Resistance +2 Undead Traits						
AI Note: Upgraded Ghoul with Stench aura — position for aura to affect multiple enemies (Sickened condition reduces attack/saves). Same paralysis cycling as Ghoul. Leads ghoul packs as a natural commander.						

Vampire Spawn						CR 4 Source: NPCDatabase_V.cs
INT 13	WIS 13	HD 4d12	HP (AVG) 26	CURRENT PROFILE Humanoid	RECOMMENDED UndeadTactical	
SPECIAL ABILITIES						
Energy Drain Dominate (Will save) Blood Drain (grapple) Turn Resistance +2 Undead Traits						
AI Note: Attempt Dominate before melee — target party leader or strongest fighter. Grapple then Blood Drain on isolated targets. Energy Drain on high-level characters for maximum level loss impact.						

Wraith

CR 5 | Source: NPCDatabase_W.cs

INT	WIS	HD	HP (AVG)	CURRENT PROFILE	RECOMMENDED
14	14	5d12	32	Humanoid	UndeadIncorporeal

SPECIAL ABILITIES

IncorporealEnergy DrainCreate SpawnDaylight PowerlessnessUndead Traits

AI Note: High INT with full incorporeal movement. Energy Drain + Create Spawn — strategic kill selection. Move through walls to reach isolated spellcasters. Avoid daylight. Retreat into solid objects when damaged.

Spectre

CR 7 | Source: NPCDatabase_S.cs

INT	WIS	HD	HP (AVG)	CURRENT PROFILE	RECOMMENDED
14	14	7d12	45	Humanoid	UndeadIncorporeal

SPECIAL ABILITIES

IncorporealEnergy DrainCreate SpawnTurn Resistance +2Daylight PowerlessnessUndead Traits

AI Note: Upgraded Wraith with higher INT. Full tactical awareness — coordinate with spawn, use flanking through walls, prioritize energy drain on high-level party members. Avoid sunlight aggressively.

 AI Behavior: High Intelligence Undead

- Target Selection:** Analyze party composition; prioritize healers, then casters, then martial
- Movement:** Sophisticated positioning; use incorporeal movement through walls to reach isolated targets
- Special Abilities:** Strategic use — Energy Drain to weaken before killing, Dominate on key targets, Paralysis cycling
- Retreat:** Will retreat strategically; use hit-and-run tactics; retreat into solid objects (incorporeal)
- Group Tactics:** Coordinate with other undead; use minions/spawn as shields and flankers

6. Special Abilities Cross-Reference

AI implications and behavior guidelines for each special ability type

The following table cross-references all special abilities with the undead that possess them and their AI behavior implications. This is the primary reference for implementing ability-specific AI logic.

Ability	Undead With It	AI Implications
Blood Drain	Vampire Spawn	Grapple then drain — prefer isolated targets; establish grapple before draining
Corrupting Touch	Ghost	Prioritize physically strong targets (targets Fort save); use melee contact reliably
Create Spawn	Greater Shadow, Mohrg, Spectre, Wight, Wight Dreadwalker, Wraith	Kill priority matters — new spawn created from slain enemies. Avoid overkilling if spawn is desired
DR 5/bludgeoning	All Skeleton Templates	Passive defense; no AI impact. Note vulnerability for player targeting
DR 5/slashing	All Zombie Templates	Passive defense; no AI impact. Note vulnerability for player targeting
Death Gaze	Bodak	Position to affect maximum enemies per round; Death save (Fort DC) on all who meet gaze
Despair (Aura)	Mummy	Passive aura — advance into melee clusters to trigger on multiple enemies simultaneously
Disease	Ghast, Ghoul, Mummy	Long-term threat; AI should prioritize contact attacks to spread disease to multiple targets
Dominate	Vampire Spawn	Target party leader or strongest fighter; maintain concentration on dominated target
Energy Drain	Ghost, Spectre, Vampire Spawn, Wight, Wight Dreadwalker, Wraith	Prioritize melee contact; targets with highest levels suffer greatest negative level impact
Frightful Moan (AoE)	Ghost	Use as opener before engaging party — AoE fear to Panic or Shaken the entire group
Improved Grab	Mohrg	Grapple → tongue paralysis → coup de grâce or continue drain
Improved Initiative	All Skeleton Templates	No AI logic impact; +4 to initiative rolls is a passive bonus
Incorporeal	Allip, Ghost, Greater Shadow, Shadow, Spectre, Wraith	Must require magic weapons; can move through walls for flanking; retreat into solid objects when damaged
Manifestation	Ghost	Toggle ethereal/material plane — use tactically to avoid concentrated damage
Mummy Rot	Mummy	Prioritize melee contact; stacks with Despair aura for compounding debuffs over time
Paralysis	Ghast, Ghoul, Mohrg	Cycle between targets to paralyze multiple enemies; coup de grâce paralyzed foes
Rejuvenation	Ghost	Ghost returns after destruction — no AI retreat behavior needed; fight aggressively
Single Actions Only	All Zombie Templates	Move OR attack per round — always attack if adjacent; move otherwise

Stench (Aura)	Ghast	Stay close to enemy cluster; Sickened condition (–2 to attacks/saves) on all within 10 ft
Turn Resistance	Ghast, Ghost, Ghoul, Greater Shadow, Shadow, Spectre, Vampire Spawn, Wight, Wight Dreadwalker, Wraith	Passive defense against cleric turning — no AI logic impact
Undead Traits	All undead	Immune to mind-affecting effects, poison, disease, critical hits, and sneak attacks

7. Recommended AI Profile Assignments

Analysis-based profile upgrades for optimal combat behavior

Complete Assignment Table

Undead	Current Profile	Recommended Profile	Reason
All Zombies (7 types)	UndeadMindless	UndeadMindless ✓	Correct — mindless, single action only
All Skeletons (8 types)	UndeadMindless	UndeadMindless ✓	Correct — mindless but full actions, Improved Initiative
Shadow	Humanoid	UndeadIncorporeal ►	Needs incorporeal movement AI + Strength damage targeting
Greater Shadow	Humanoid	UndeadIncorporeal ►	Incorporeal movement + Create Spawn awareness required
Allip	Humanoid	UndeadIncorporeal ►	Incorporeal; Babble AoE needs positioning logic
Wraith	Humanoid	UndeadIncorporeal ►	Incorporeal + Energy Drain + Create Spawn tactics
Spectre	Humanoid	UndeadIncorporeal ►	Incorporeal + Energy Drain; high INT needs full tactics
Ghost	Humanoid	UndeadIncorporeal ►	Incorporeal with multiple specials; needs complex AI
Ghoul	Humanoid	UndeadTactical ►	High INT; should cycle paralysis between targets
Ghast	Humanoid	UndeadTactical ►	High INT; paralysis + stench aura positioning
Wight	Undead	UndeadTactical ►	Average INT; Energy Drain + Create Spawn tactics
Wight Dreadwalker	Humanoid	UndeadTactical ►	Enhanced Wight; coordinated Energy Drain needed
Vampire Spawn	Humanoid	UndeadTactical ►	High INT; Dominate + Blood Drain combo
Mummy	Humanoid	UndeadBrute ►	Low INT but tough; Despair aura + Mummy Rot
Bodak	Humanoid	UndeadBrute ►	Low INT; Death Gaze needs facing/positioning
Mohrg	Grappler	Grappler ✓	Correct — Improved Grab into tongue paralysis

New AI Profiles Required

✓ **UndeadMindless** (Already Implemented)

Already correctly implemented for all zombies and skeletons. Handles single action restriction for zombies and Improved Initiative for skeletons. Attack nearest target, no retreat, no tactics.

► **UndeadIncorporeal** (New — Priority 1)

Applies to: Shadow, Greater Shadow, Allip, Wraith, Spectre, Ghost

Required Behaviors

- Move through walls to reach isolated or unsupported targets (spellcasters behind lines)
- Retreat into solid objects when below 40% HP to avoid damage
- Prefer targets vulnerable to touch attacks; track magic weapon users on enemy side
- Create Spawn awareness — avoid overkilling when undead minions are tactically valuable
- Strength Damage users (Shadow, Greater Shadow): target STR-dependent melee fighters
- Energy Drain users: prioritize targets with most character levels
- **Ghost special:** Frightful Moan as opener; toggle Manifestation to avoid focus fire

► **UndeadTactical** (New — Priority 2)

Applies to: Ghoul, Ghast, Wight, Wight Dreadwalker, Vampire Spawn

Required Behaviors

- Cycle paralysis attacks between multiple targets rather than focusing one enemy
- Ghast: position for Stench aura to affect maximum enemy count simultaneously
- Energy Drain users: concentrate negative levels on key party members (healers, casters)
- Vampire Spawn: attempt Dominate before entering melee; target the party's strongest fighter
- Pack coordination: one paralysis attacker locks down target, others attack the helpless enemy
- Deliver coup de grâce against paralyzed or helpless enemies when opportunity arises

► **UndeadBrute** (New — Priority 3)

Applies to: Mummy, Bodak

Required Behaviors

- Mummy: advance into melee range, let Despair aura trigger on clustered enemies, then slam for Mummy Rot
- Bodak: position for Death Gaze line-of-sight to affect maximum enemies per round facing
- Low INT limits tactical complexity — straightforward but effective melee/gaze approach
- Neither retreats; rely on DR and Turn Resistance for passive survival
- Bodak: avoid direct sunlight (takes 1 Con damage per round in sunlight)

8. Source File Index

Unity project C# source files referenced by this compendium

File	Count	Contents / Notes
NPCDatabaseCustom.cs	4	Custom variants: Skeleton Warrior, Skeleton Archer, Zombie, Wight Dreadwalker
NPCDatabase_A.cs	1	Allip (Average INT, incorporeal, Wisdom drain)
NPCDatabase_B.cs	1	Bodak (Low INT, CR 8, Death Gaze)
NPCDatabase_G.cs	4	Ghoul, Ghast, Ghost, Greater Shadow
NPCDatabase_M.cs	2	Mohrg (Grappler), Mummy (Brute)
NPCDatabase_S.cs	2	Shadow (incorporeal), Spectre (incorporeal + energy drain)
NPCDatabase_V.cs	1	Vampire Spawn (Dominate + Blood Drain)
NPCDatabase_W.cs	2	Wight (energy drain), Wraith (incorporeal + energy drain)
SkeletonTemplate.cs	8	Factory-generated skeleton variants — uses template pattern for all 8 types
ZombieTemplate.cs	7	Factory-generated zombie variants — uses template pattern for all 7 types

14

PROFILES TO
UPGRADE

Implementation Priority:

- 1. **UndeadIncorporeal** — affects 6 creatures including Ghost (CR 7) and Spectre (CR 7)
- 2. **UndeadTactical** — affects 5 creatures including Vampire Spawn (CR 4) and Ghast (CR 3)
- 3. **UndeadBrute** — affects Mummy (CR 5) and Bodak (CR 8); simpler implementation
