

Summon Nature's Ally I-IV — Creature Audit Report

Date: 2026-05-26

Scope: Audit the current SNA I-IV creature lists (commit `7d7a968`) against the canonical D&D 3.5 PHB tables (p.288-289) and cross-reference with the project's NPCDatabase.

Action required: This is an audit-only report. No code changes have been made.

Executive Summary

Metric	Count
Total canonical SNA I-IV creatures	45
Present in NPCDatabase (direct ID)	29
Resolvable via summon alias	1 (owl → eagle)
Missing from NPCDatabase entirely	15
Wrong entries in current SNA lists	18 (creatures at wrong level or not on SNA list at all)
Current lists using wrong NpcDefinitionId	1 (Brown Bear uses <code>dire_bear</code> instead of <code>brown_bear</code>)

Critical Finding

The current SNA lists are based on the Summon Monster (SM) creature tables, not the Summon Nature's Ally (SNA) tables. The SNA and SM lists are completely different in D&D 3.5e — SM summons celestial/fiendish-templated animals and outsiders, while SNA summons regular animals, fey, and elementals (no templates). Every single SNA level has incorrect creatures assigned.

Existing Summon Aliases to Review

The current alias system maps some summon IDs to unrelated creatures as stand-ins:

Alias ID	Maps To	Display Name	Assessment
wolf	wolf_pack_hunter	Wolf	✓ Reasonable — wolf variant
badger	dire_badger	Badger	⚠ Wrong — Badger ≠ Dire Badger (differ- ent CR)
riding_dog	dog	Riding Dog	⚠ Reversed — should be dog ali- asing to riding_dog, not vice versa
owl	eagle	Owl	⚠ Wrong creature entirely — Owl and Eagle are different animals
raven	eagle	Raven	⚠ Wrong creature entirely
giant_bee	dire_bat	Giant Bee	⚠ Wrong creature entirely

Recommended Action Plan

Phase 1 — Fix Creature Lists (no new NPCs needed)

Rewrite `GetSummonNaturesAllyI-IV()` using only creatures that already exist in NPCDatabase. This alone gives us 27 land creatures across all 4 levels (vs. the current 24 entries, most of which are wrong).

Phase 2 — Add Medium & Large Elementals (8 NPCs)

Scale up from existing Small Elemental templates. These are core to the SNA identity (druids summoning nature spirits) and needed for levels III & IV.

Phase 3 — Add Missing Animals (3 NPCs)

- `dire_wolverine` — scale up from `wolverine`
- `giant_crocodile` — scale up from `crocodile`
- `satyr` — new fey creature (CR 2 without pipes)

Phase 4 — Add Special Creatures (1 NPC)

- `unicorn` — magical beast with special abilities (MM p.249)

Phase 5 — Aquatic Creatures (3 NPCs, optional)

- `porpoise`, `medium_shark`, `squid` — only if aquatic combat is added
