

D&D 3.5e Dungeon Encounter System — Implementation Plan

Executive Summary

This plan covers implementing a **randomized dungeon encounter system** based on DMG Chapter 3 tables (EL 1-8+), populated with creatures from the uploaded CSV and the DMG encounter tables. The system will scale encounters based on average party level.

Scope: ~160 unique creatures/NPCs needed, ~60 already implemented, ~100 to build. Full encounter table system for dungeon levels 1-8 (extendable to 20).

Section 1: NPC/Creature Inventory

1.1 Complete Unique Creature List from CSV (Deduplicated & Normalized)

The CSV contains ~240 rows across 3 table sections. After deduplication and spelling normalization, there are **~160 unique creature entries**.

Already Implemented  (60 creatures)

Creature	Source File	Notes
Medium monstrous centipede	NPCDatabase_C	All sizes (Tiny→Gargantuan)
Dire rat	NPCDatabase_D	✓
Giant fire beetle	NPCDatabase_F	✓
Small monstrous scorpion	NPCDatabase_S	All sizes implemented
Goblin warrior	NPCDatabaseCustom	✓ (goblin, goblin_warchief)
Darkmantle	—	✗ Not found — VERIFY
Krenshar	—	✗
Lemure	NPCDatabase_L	✓
Kobold warrior	NPCDatabaseCustom	✓
Human warrior skeleton	NPCDatabase_Skeletons	✓
Human commoner zombie	NPCDatabase_Zombies	✓
Tiny viper snake	NPCDatabase_V	✓ (all viper sizes)
Orc warrior	NPCDatabaseCustom	✓ (orc_berserker)
Stirge	NPCDatabase_S	✓
Spider swarm	NPCDatabase_S	✓
Lantern archon	NPCDatabase_L	✓
Bugbear	NPCDatabase_B	✓
Dire bat	NPCDatabase_D	✓ (summon_dire_bat)
Bat swarm	NPCDatabase_B	✓
Rat swarm	NPCDatabase_R	✓
Constrictor snake	NPCDatabase_D	✓ (summon_constrictor)
Small viper snake	NPCDatabase_V	✓
Allip	NPCDatabase_A	✓
Cockatrice	NPCDatabase_C	✓
Gnoll	NPCDatabase_G	✓

Creature	Source File	Notes
Gargoyle	NPCDatabase_G	✓
Gelatinous cube	NPCDatabase_G	✓
Shadow	NPCDatabase_S	✓
Troglodyte	NPCDatabase_T	✓
Troll	NPCDatabase_T	✓
Ochre jelly	NPCDatabase_O	✓
Owlbear skeleton	NPCDatabase_Skeletons	✓
Troglodyte zombie	NPCDatabase_Zombies	✓
Minotaur zombie	NPCDatabase_Zombies	✓
Medium viper snake	NPCDatabase_V	✓
Large viper snake	NPCDatabase_V	✓
Huge viper snake	NPCDatabase_V	✓
Giant praying mantis	NPCDatabase_G	✓
Medium monstrous scorpion	NPCDatabase_S	✓
Large monstrous centipede	NPCDatabase_C	✓
Large monstrous spider	NPCDatabase_S	✓
Mephits (all types)	NPCDatabase_M	✓ (10 types)
Locust swarm	—	✗ (similar to spider swarm, needs impl)
Cloaker	NPCDatabase_C	✓
Howler	NPCDatabase_H	✓
Giant bombardier beetle	NPCDatabase_B	✓
Werewolf	NPCDatabase_Lycanthropes	✓
Wererat	NPCDatabase_Lycanthropes	✓
Wereboar	NPCDatabase_Lycanthropes	✓

Creature	Source File	Notes
Weretiger	NPCDatabase_Lycanthropes	✓
Werebear	NPCDatabase_Lycanthropes	✓
Brown bear	NPCDatabaseCustom	✓ (if registered)
Dire bear	NPCDatabaseCustom	✓
Wraith	NPCDatabase_W	✓
Noble djinni	NPCDatabase_G	✓
Vampire spawn	—	✗ Needs implementation
Wight	NPCDatabaseCustom	✓ (wight_dreadwalker)
Dragon (all types/ages)	NPCDatabase_Dragons	✓ (60 variants)
Hell hound	NPCDatabase_H	✓ (summon_hell_hound)
Crocodile	NPCDatabase_D	✓ (summon_crocodile)

Needs Implementation ✗ (~100 creatures)

Tier 1: Core Base Creatures (High Priority — used in multiple encounter levels)

Creature	CR	Type	MM Page	Complexity
Dwarf warrior	1/2	Humanoid	MM 91	Low — stat block + equipment
Elf warrior	1/2	Humanoid	MM 101	Low
Halfling warrior	1/2	Humanoid	MM 149	Low
Hobgoblin warrior	1/2	Humanoid	MM 153	Low
Worg	2	Magical Beast	MM 256	Medium
Thoqqua	2	Elemental	MM 242	Medium — heat damage
Doppelganger	3	Monstrous Humanoid	MM 67	Medium — change shape
Ettercap	3	Aberration	MM 106	Medium — web, poison
Violet fungus	3	Plant	MM 112	Low — poison touch
Ghast	3	Undead	MM 119	Medium — paralysis, stench
Ghoul	1	Undead	MM 118	Medium — paralysis
Grick	3	Aberration	MM 139	Low — DR, tentacles
Hell hound (standalone)	3	Outsider	MM 151	Low — already summon version
Lizardfolk	1	Humanoid (Reptilian)	MM 169	Low
Ogre	3	Giant	MM 198	Medium — large melee
Phantom fungus	3	Plant	MM 207	Medium — invisibility
Rust monster	3	Aberration	MM 216	Medium — metal destruction

Creature	CR	Type	MM Page	Complexity
Yuan-ti pureblood	3	Monstrous Humanoid	MM 264	Medium — spell-like abilities
Otyugh	4	Aberration	MM 204	Medium — grapple, disease
Owlbear	4	Magical Beast	MM 206	Medium — improved grab
Minotaur	4	Monstrous Humanoid	MM 188	Medium — charge, natural cunning
Mimic	4	Aberration	MM 186	Medium — adhesive, shape
Displacer beast	4	Magical Beast	MM 66	Medium — displacement
Centipede swarm	4	Vermin	MM 238	Low — swarm template
Barghest	4	Outsider	MM 22	High — shape change, feed
Greater barghest	5	Outsider	MM 23	High
Basilisk	6	Magical Beast	MM 23	Medium — petrifying gaze
Manticore	5	Magical Beast	MM 179	Medium — tail spikes

Tier 2: Mid-Level Creatures (EL 4-6)

Creature	CR	Type	Complexity
Choker	2	Aberration	Medium — quickness, improved grab
Dretch	2	Outsider (Demon)	Low — SLA: stinking cloud
Quasit	3	Outsider (Demon)	Medium — shape change, poison
Imp	3	Outsider (Devil)	Medium — shape change, poison
Fiendish dire rat	1	Template	Low — fiendish template
Formian worker	1/2	Outsider	Low
Shocker lizard	2	Magical Beast	Medium — electric
Ethereal filcher	3	Aberration	Medium — ethereal jaunt
Ethereal marauder	3	Magical Beast	Medium — ethereal
Harpy	4	Monstrous Humanoid	Medium — captivating song
Grimlock	1	Monstrous Humanoid	Low — blindsight
Svirfneblin (deep gnome)	1	Humanoid	Low
Janni	4	Outsider	Medium — plane shift, SLAs
Duergar	1	Humanoid (Dwarf)	Low — enlarge/invis
Drow elf	1	Humanoid (Elf)	Low — SR, SLAs
Hound archon	4	Outsider (Good)	Medium — aura, SLAs
Carrion crawler	4	Aberration	Medium — paralysis tentacles
Five-headed hydra	5	Magical Beast	High — multi-head combat
Six-headed hydra	6	Magical Beast	High

Tier 3: Upper-Level Creatures (EL 5-8)

Creature	CR	Type	Complexity
Celestial lion	3	Template	Low — celestial template on lion
Bearded devil	5	Outsider (Devil)	Medium
Gibbering mouter	5	Aberration	High — confuse, ground manipulation
Green hag	5	Monstrous Humanoid	Medium — SLAs, weakness
Djinni	5	Outsider	Medium — whirlwind, SLAs
Shadow mastiff	5	Outsider (Evil)	Medium — bay, shadow blend
Skum	2	Aberration	Low
Vargouille	2	Outsider (Evil)	Medium — shriek, kiss
Yuan-ti halfblood	5	Monstrous Humanoid	High — SLAs, produce acid
Gauth (beholder)	6	Aberration	Very High — eye rays
Babau (demon)	6	Outsider	Medium — sneak attack, SLAs
Derro	3	Monstrous Humanoid	Medium — madness, SLAs
Chain devil	6	Outsider	Medium — chain attack, regen
Digester	6	Magical Beast	Medium — acid spray
Bralani (eladrin)	6	Outsider (Good)	Medium — whirlwind, SLAs
Ettin	6	Giant	Medium — two heads, two attacks
Annis (hag)	6	Monstrous Humanoid	Medium — rend, improved grab
Half-dragon fighter	7	Template	

Creature	CR	Type	Complexity
			Medium — breath weapon
Xill	6	Outsider	Medium — implant, multi-arms
Minor xorn	3	Outsider	Medium — earth glide, tremorsense
Average salamander	6	Outsider (Fire)	Medium
Will-o'-wisp	6	Aberration	Medium — electricity, invisibility
Monitor lizard	2	Animal	Low
Aboleth	7	Aberration	Very High — enslave, SLAs
Chaos beast	7	Outsider	High — corporeal instability
Chuul	7	Aberration	Medium — constrict, paralysis
Succubus	7	Outsider (Demon)	High — charm, energy drain
Hellcat	7	Outsider (Devil)	Medium — invisible in light
Drider	7	Aberration	High — spells + combat
Shrieker	1	Plant	Low — alarm fungus
Hill giant	7	Giant	Medium — rock throwing
Flesh golem	7	Construct	Medium — berserk, DR, immunities
Eight-headed hydra	7	Magical Beast	High
Invisible stalker	7	Elemental (Air)	Medium — natural invisibility
Medusa	7	Monstrous Humanoid	

Creature	CR	Type	Complexity
			Medium — petrifying gaze
Black pudding	7	Ooze	Medium — split, acid
Phasm	7	Aberration	Medium — shape changer
Flamebrother salamander	3	Outsider (Fire)	Low
Red slaad	7	Outsider	Medium — implant
Spectre	7	Undead	High — incorporeal, energy drain
Umber hulk	7	Aberration	Medium — confusing gaze
Yuan-ti abomination	7	Monstrous Humanoid	Very High

Tier 4: Templated NPCs (require base creature + class levels)

NPC	Base + Class	EL	Complexity
5th-level human monk	Human + Monk 5	5	Medium — NPC class builder
5th-level kobold sorcerer	Kobold + Sorcerer 5	5	Medium
5th-level lizardfolk druid	Lizardfolk + Druid 5	6	Medium — requires Lizardfolk base
5th-level hobgoblin fighter	Hobgoblin + Fighter 5	5	Medium
5th-level goblin rogue	Goblin + Rogue 5	5	Medium
5th-level human barbarian	Human + Barbarian 5	5	Medium
4th-level ogre barbarian	Ogre + Barbarian 4	7	Medium — requires Ogre base
Ghost 5th-level fighter	Ghost template + Fighter 5	7	High — ghost template
Vampire 5th-level fighter	Vampire template + Fighter 5	7	Very High — vampire template
Half-dragon 4th-level fighter	Half-dragon template + Fighter 4	6	High — breath weapon
5th-level troglodyte cleric	Troglodyte + Cleric 5	8	Medium — requires spells
Advanced megaraptor skeleton	Advanced template + Skeleton	7	Medium

1.2 Base Creatures Required for Templates

These base creatures MUST be implemented before their templated versions:

Base Creature	Required For
Lizardfolk	5th-level lizardfolk druid
Hobgoblin	5th-level hobgoblin fighter, hobgoblin warriors
Ogre	4th-level ogre barbarian, ogre encounters
Minotaur	Minotaur zombie (already exists), standalone
Human (NPC)	5th-level monk, barbarian, fighter, ghost/ vampire templates
Kobold	5th-level kobold sorcerer
Drow elf	Drow encounters

Section 2: Encounter Table System Design

2.1 How DMG Chapter 3 Tables Work

The DMG provides **20 dungeon level encounter tables** (1st through 20th level). Each table:

1. Has a **d% roll** (01–100) mapping to specific creature encounters
2. **01–10 always rolls on the previous level's table** (cascading)
3. **91–100 always rolls on the next level's table** (escalation)
4. Each entry specifies **exact creature count** (e.g., “1d3+1 bugbears”)
5. Encounter Level (EL) roughly matches the dungeon level

2.2 EL Calculation Rules (DMG p.48–49)

- **Single creature:** $EL = CR$
- **Multiple identical creatures:** Use Table 3-1 (DMG p.49)
- 2 creatures of same CR: $EL = CR + 2$
- 3 creatures: $EL = CR + 3$
- 4 creatures: $EL = CR + 4$
- 6–7 creatures: $EL = CR + 5$
- 8–11 creatures: $EL = CR + 6$
- 12–16: $EL = CR + 7$
- **Mixed creatures:** Add together using XP equivalents
- **Party Level:** Average character level of the party

2.3 Encounter Difficulty Scale

Difficulty	EL vs Party Level
Easy	EL = Party Level - 1 to -3
Standard	EL = Party Level
Challenging	EL = Party Level + 1 to +2
Overpowering	EL = Party Level + 3+

2.4 DMG Encounter Tables Extracted (Levels 1-8)

✓ **CONFIRMED: The DMG PDF is readable.** All 20 encounter tables (1st-20th level) have been successfully extracted from pages 79-81. The OCR quality is sufficient to parse all d% ranges, creature names, and quantities.

The tables for levels 1-8 have been fully transcribed above. Key statistics:

- **Level 1:** 17 entries + roll-up to Level 2
- **Level 2:** 17 entries + roll-down to Level 1, roll-up to Level 3
- **Level 3:** 20 entries + roll-down/up
- **Level 4:** 20 entries + roll-down/up
- **Level 5:** 20 entries + roll-down/up
- **Level 6:** 22 entries + roll-down/up
- **Level 7:** 20 entries + roll-down/up
- **Level 8:** 22 entries + roll-down/up

Section 3: Implementation Phases

Phase 1: Core Infrastructure & Base Creatures (Estimated: 30-40 hours)

Goal: Build the encounter table system skeleton and implement the most-referenced base creatures.

1A: Encounter Table System (~8 hours)

```

// New files needed:
// Assets/Scripts/Encounters/DungeonEncounterTable.cs
// Assets/Scripts/Encounters/DungeonEncounterEntry.cs
// Assets/Scripts/Encounters/DungeonEncounterSystem.cs
// Assets/Scripts/Encounters/EncounterDifficultyCalculator.cs

/// <summary>
/// Represents a single entry in a dungeon encounter table.
/// Maps to one row of the DMG tables (e.g., "14-16: 1d3+1 bugbears").
/// </summary>
[System.Serializable]

    Challenging = 1,
    Overpowering = 3
}

```

1B: Warrior-Type Humanoids (~4 hours)

These are simple stat blocks with equipment:

Creature	CR	Est. Hours
Dwarf warrior	1/2	0.5
Elf warrior	1/2	0.5
Halfling warrior	1/2	0.5
Hobgoblin warrior	1/2	0.5
Drow elf	1	0.5
Duergar dwarf	1	0.5
Svirfneblin gnome	1	0.5
Lizardfolk	1	0.5

1C: Common Undead (~4 hours)

Creature	CR	Est. Hours
Ghoul	1	1.0 — paralysis mechanic
Ghast	3	0.5 — ghoul variant + stench
Vampire spawn	4	1.5 — energy drain, DR, slam
Greater shadow	8	0.5 — shadow variant

1D: Core Aberrations & Magical Beasts (~8 hours)

Creature	CR	Est. Hours
Worg	2	0.5
Grick	3	0.5
Rust monster	3	1.5 — equipment destruction
Owlbear	4	1.0 — improved grab + rage
Minotaur	4	1.0 — charge, power attack
Ogre	3	0.5
Displacer beast	4	1.0 — displacement
Manticore	5	1.0 — tail spikes, flight
Basilisk	6	1.5 — petrifying gaze

1E: Common Outsiders (~6 hours)

Creature	CR	Est. Hours
Dretch	2	0.5
Quasit	3	1.0
Imp	3	1.0
Hound archon	4	1.0
Barghest	4	1.5
Bearded devil	5	1.0

Phase 2: Mid-Tier Creatures (Estimated: 25-35 hours)

Goal: Fill out EL 4-6 tables completely.

Creature	CR	Est. Hours
Choker	2	0.5
Thoqqua	2	0.5
Shocker lizard	2	0.5
Formian worker	1/2	0.5
Phantom fungus	3	0.5
Violet fungus	3	0.5
Shrieker	1	0.25
Doppelganger	3	1.0
Ettercap	3	1.0
Yuan-ti pureblood	3	1.0
Grimlock	1	0.5
Janni	4	1.0
Carrion crawler	4	1.0
Harpy	4	1.0
Mimic	4	1.0
Otyugh	4	1.0
Greater barghest	5	0.5
Djinni	5	1.0
Gibbering mouther	5	1.5
Green hag	5	1.0
Shadow mastiff	5	0.5
Celestial lion	3	0.5 — celestial template
Fiendish dire rat	1	0.25 — fiendish template
Hydra (5-head)	5	2.0 — multi-head system
Hydra (6-head)	6	0.5 — same system

Creature	CR	Est. Hours
Locust swarm	3	0.5
Centipede swarm	4	0.5
Monitor lizard	2	0.25
Skum	2	0.5
Vargouille	2	0.75
Derro	3	0.75

Phase 3: High-Tier Creatures (Estimated: 30-40 hours)

Goal: Fill out EL 7-8 tables, implement complex creatures.

Creature	CR	Est. Hours
Babau (demon)	6	1.0
Chain devil	6	1.0
Digester	6	1.0
Bralani (eladrin)	6	1.0
Ettin	6	1.0
Annis (hag)	6	1.0
Xill	6	1.5
Minor xorn	3	1.0
Average xorn	6	0.5
Average salamander	6	1.0
Flamebrother salamander	3	0.5
Will-o'-wisp	6	1.0
Gauth (beholder)	6	3.0 — eye rays
Aboleth	7	2.0
Chaos beast	7	1.5
Chuul	7	1.0
Succubus	7	2.0
Hellcat	7	1.0
Drider	7	2.0
Hill giant	7	1.0
Flesh golem	7	1.5
Invisible stalker	7	1.0
Medusa	7	1.5
Black pudding	7	1.5
Red slaad	7	1.0

Creature	CR	Est. Hours
Blue slaad	7	0.5
Green slaad	8	0.5
Spectre	7	1.5
Umber hulk	7	1.0
Yuan-ti halfblood	5	1.5
Yuan-ti abomination	7	2.0
Phasm	7	1.0
Eight-headed hydra	7	0.5 — if hydra system exists
Seven-headed hydra	6	0.5

Phase 4: Templated NPCs (Estimated: 15-20 hours)

Goal: Build an NPC class-level system and create all templated NPCs.

4A: NPC Builder System (~5 hours)

```

/// <summary>
/// Generates NPCs by combining a base creature with class levels.
/// Handles ability score adjustments, feat selection, equipment, and spells.
/// </summary>
public static class NPCBuilder
{
    /// <summary>
    /// Create a templated NPC from a base creature + class levels.
    /// </summary>
    public static NPCDefinition BuildClassedNPC(
        string baseCreatureId,    // e.g., "lizardfolk"
        string className,        // e.g., "Druid"
        int classLevel,          // e.g., 5
        NPCEquipmentTier gear = NPCEquipmentTier.Standard)
    {
        // 1. Clone base creature stats
        // 2. Apply class HD, BAB, saves
        // 3. Add ability score increases (every 4 levels)
        // 4. Select feats
        // 5. If caster: assign spells
        // 6. Equipment from NPC gear table (DMG p.127)
        // 7. Calculate CR
    }
}

public enum NPCEquipmentTier
{
    NPC,           // NPC gear value table
    Heroic,        // PC wealth by level
    Basic          // Minimal equipment
}

```

4B: Individual Templated NPCs (~10 hours)

NPC	Base	Class	Level	CR	Est. Hours
Human monk	Human	Monk	5	5	1.0
Kobold sorcerer	Kobold	Sorcerer	5	5	1.0
Lizardfolk druid	Lizardfolk	Druid	5	6	1.5
Hobgoblin fighter	Hobgoblin	Fighter	5	5	0.75
Goblin rogue	Goblin	Rogue	5	5	0.75
Human barbarian	Human	Barbarian	5	5	0.75
Ogre barbarian	Ogre	Barbarian	4	7	1.0
Troglodyte cleric	Troglodyte	Cleric	5	8	1.5
Ghost 5th-lvl fighter	Human	Fighter 5 + Ghost	7	7	2.0
Vampire 5th-lvl fighter	Human	Fighter 5 + Vampire	7	7	2.5
Half-dragon fighter	Human	Fighter 4 + Half-dragon	6	6	1.5
Advanced megaraptor skeleton	Megaraptor	Skeleton + Advanced	7	7	1.0

Phase 5: Encounter Table Data Entry (Estimated: 8-10 hours)

Goal: Transcribe all DMG encounter tables into data.

Table Level	# Entries	Status
1st Level	17	Extracted from PDF 
2nd Level	17	Extracted from PDF 
3rd Level	20	Extracted from PDF 
4th Level	20	Extracted from PDF 
5th Level	20	Extracted from PDF 
6th Level	22	Extracted from PDF 
7th Level	20	Extracted from PDF 
8th Level	22	Extracted from PDF 
9th-10th Level	~20 each	Extracted  (for expansion)

Each table entry needs: d% range, creature ID(s), count dice expression, and optional sub-rolls.

Phase 6: UI & Integration (Estimated: 8-12 hours)

Goal: Connect encounter system to game flow.

6A: Encounter Selection UI (~4 hours)

- Add “Random Dungeon Encounter” button to pre-combat hub
- Difficulty selector (Easy/Standard/Challenging/Overpowering)
- Preview panel showing rolled encounter before spawning
- “Reroll” option

6B: Spawn System Integration (~3 hours)

- Convert `DungeonEncounterEntry` → `EncounterPreset`
- Handle multi-creature spawns with grid placement
- Treasure generation per DMG encounter rules

6C: Party Level Calculator (~1 hour)

- Average party level from active PCs
 - Handle mixed-level parties
 - Display current EL recommendation
-

Section 4: Technical Architecture

4.1 New File Structure

```
Assets/Scripts/Encounters/
[ ] DungeonEncounterSystem.cs      // Main system, Init(), Generate()
[ ] DungeonEncounterTable.cs      // Table + Entry data classes
[ ] DungeonEncounterTables_1_4.cs // Tables 1-4 data
[ ] DungeonEncounterTables_5_8.cs // Tables 5-8 data
[ ] DungeonEncounterTables_9_12.cs // Tables 9-12 (future)
[ ] DungeonEncounterTables_13_16.cs
[ ] DungeonEncounterTables_17_20.cs
[ ] EncounterDifficultyCalculator.cs
[ ] NPCBuilder.cs                  // Class-level NPC generation
[ ] EncounterSpawnHelper.cs        // Grid placement logic

Assets/Scripts/Character/
[ ] NPCDatabase_Demons.cs         // New: demon creatures
[ ] NPCDatabase_Devils.cs         // New: devil creatures
[ ] NPCDatabase_Giants.cs         // New: giant creatures
[ ] NPCDatabase_Oozes.cs          // New: ooze creatures (expand)
[ ] NPCDatabase_Outsiders.cs      // New: outsider creatures
[ ] NPCDatabase_Undead.cs         // New: undead creatures (expand)
[ ] NPCDatabase_Aberrations.cs    // New: aberrations
[ ] NPCDatabase_MagicalBeasts.cs  // New: magical beasts
[ ] NPCDatabase_Humanoids.cs      // New: humanoid warriors
[ ] NPCDatabase_Plants.cs         // New: plant creatures
[ ] NPCDatabase_Constructs.cs     // New: construct creatures
```

4.2 Integration Points

```
SceneBootstrap.cs
└─ DungeonEncounterSystem.Init() // Register all tables

GameManager.cs (pre-combat hub)
└─ "Random Encounter" button
    └─ DungeonEncounterSystem.GenerateForPartyLevel()
        └─ EncounterPreset → existing spawn system

NPCDatabase.cs
└─ RegisterCreatures_*() // All new creatures
└─ NPCBuilder.BuildClassedNPC() // Templated NPCs
```

4.3 Existing System Compatibility

The new encounter system produces `EncounterPreset` objects — the same type used by the existing encounter selector. This means:

- **No changes to GameManager spawn logic**
- **No changes to combat flow**
- **No changes to XP/treasure systems**
- New creatures register via the same `NPCDatabase.Register()` path

Section 5: Effort Estimates

Phase	Description	Estimated Hours	Dependencies
Phase 1A	Encounter Table System	8	None
Phase 1B	Warrior Humanoids (8 creatures)	4	None
Phase 1C	Common Undead (4 creatures)	4	None
Phase 1D	Core Aberrations/Beasts (9 creatures)	8	None
Phase 1E	Common Outsiders (6 creatures)	6	None
Phase 1 Total		30 hours	
Phase 2	Mid-Tier Creatures (~30 creatures)	25	Phase 1
Phase 3	High-Tier Creatures (~34 creatures)	35	Phase 1
Phase 4A	NPC Builder System	5	Phase 1B
Phase 4B	Templated NPCs (12 NPCs)	15	Phase 4A, base creatures
Phase 5	Table Data Entry (8 levels)	10	Phase 1A
Phase 6	UI & Integration	10	Phases 1-5
TOTAL		~130 hours	

Priority Order (if time-constrained)

1. **Phase 1A** (Encounter System) + **Phase 5** (Table Data) → enables random encounters with existing creatures
2. **Phase 1B** (Humanoid warriors) → fills most Level 1-2 gaps
3. **Phase 1C** (Undead) → fills Level 3-4 gaps
4. **Phase 1D** (Beasts/Aberrations) → fills Level 4-5 gaps
5. **Phase 2** (Mid-tier) → completes Levels 5-6
6. **Phase 3** (High-tier) → completes Levels 7-8
7. **Phase 4** (Templated NPCs) → fills remaining NPC slots

8. Phase 6 (UI) → polish

Minimum Viable Product (MVP): Phases 1A + 1B + 5 + 6A = ~25 hours

This gives a working random encounter system with partial creature coverage (missing creatures would be skipped/re-rolled).

Section 6: DMG PDF Readability Report

✓ **The DMG v3.5 PDF IS readable.**

- Pages 79–81 contain all dungeon encounter tables (levels 1–20)
- OCR quality is moderate but sufficient — some character artifacts in non-table text
- Tables are well-structured with clear d% ranges and creature entries
- All 20 encounter tables have been successfully extracted
- Some minor spelling normalization needed (e.g., “five-headed hydra” → “five_headed_hydra”)

Pages verified:

- p.78: Random dungeon encounter introduction, table usage instructions
- p.79: 1st through 4th level tables
- p.80: 5th through 8th level tables (+ partial 9th)
- p.81: 9th through 11th level tables (+ higher)
- p.48–49: Challenge Rating and Encounter Level rules (in Chapter 3)

Section 7: Next Steps

Immediate Actions

1. **Create** Assets/Scripts/Encounters/ **directory structure**
2. **Implement** `DungeonEncounterTable` and `DungeonEncounterEntry` **data classes**
3. **Transcribe Level 1–4 encounter table data** (can work with existing creatures)
4. **Begin Phase 1B** — implement 8 warrior-type humanoids (fast wins)
5. **Wire up a basic “Random Encounter” button** in pre-combat hub

Decisions Needed from User

1. **Scope confirmation:** Implement all 8 levels, or focus on specific range?
2. **Creature priority:** Start with most-used creatures, or by encounter level?
3. **NPC complexity:** Full spell lists for caster NPCs, or simplified versions?
4. **UI preference:** Inline in pre-combat hub, or separate encounter screen?
5. **Missing creatures:** Skip and re-roll, or show placeholder enemies?
