Effort Estimates (Realistic)

Effort Level	Description	Time per Creature
Easy	Stat block only, no special mechanics	15-30 min
Medium	Needs 1-2 special abilities (poison, grab, etc.)	30-60 min
Hard	Complex mechanics (shape-shifting, gaze attacks, spell-like abilities, multi-head)	1-3 hours

Tier	Creatures	Est. Time	Priority
Tier 1	23	2-3 days	Do first — covers 80% of low-level dungeon encounters
Tier 2	24	4-5 days	Do second — fills mid-level gaps
Tier 3	52	8-12 days	Do as needed — many are niche/high-CR
TOTAL	99	~14-20 days	

New Systems Needed for Full Coverage

Some missing creatures require mechanics that don't exist yet:

1. **Skeleton/Zombie Templates** — Apply undead template to any base creature (Owlbear skeleton, Minotaur zombie, etc.). Medium effort to build, then easy to stamp out variants.
2. **Lycanthrope Templates** — Alternate form, DR/silver, hybrid stats. Hard to build (2-3 days), then medium to create each lycanthrope.
3. **Hydra Head System** — Variable head count affecting attacks/HP. Hard to build (1-2 days), then easy to stamp out variants.
4. **Gaze Attack System** — Basilisk petrification, Bodak death gaze. Medium to build (1 day).
5. **Fiendish/Celestial Templates** — Already partially done (fiendish_wolf, fiendish_dire_bear), but needs generalization.
6. **Construct Immunity System** — Magic immunity for golems. Medium effort.
7. **Rock Throwing** — Giants need ranged rock attacks. Easy.

Recommendation

Phase 1 (immediate): Tier 1 creatures. These are the “bread and butter” of dungeon crawling. Completing 23 creatures in 2-3 days gives huge encounter table coverage.

Phase 2 (next week): Tier 2 creatures + skeleton/zombie templates. This covers most remaining encounter table entries through CR 7.

Phase 3 (as needed): Tier 3 creatures, built on-demand as encounters require them. Many of these are for specific themed areas (planar dungeons, underdark, etc.) and aren't needed for general play.

Report generated by automated code scan. All "Implemented" entries verified by grep against actual source code in NPCDatabase.cs files.*
