Getting Started

This prototype implements over **300 magic items** from the D&D 3.5e Dungeon Master's Guide with ~95% fidelity to the source rules. Magic items are divided into several categories:

Category	Count	Examples
Rings	33	Ring of Protection, Ring of Invisibility, Ring of Spell Turning
Rods	36	Metamagic Rods (21), Combat Rods (7), Utility (5), Legendary (3)
Staves	20	Staff of Fire, Staff of Power, Staff of the Woodlands
Wondrous Items	164+	Boots of Speed, Bag of Holding, Figurines of Wondrous Power
Specific Weapons/Armor	54	Holy Avenger, Oathbow, Frost Brand, Mithral Full Plate of Speed

All items follow D&D 3.5e stacking rules, activation mechanics, and use limitations.

Inventory & Equipment Basics

Opening the Inventory

Press **I** during your active character's turn to open the Inventory panel. The panel displays:

- **Equipment Slots** (top) — 14 body slots arranged in a 7×2 grid
- **General Inventory** (bottom) — 20 slots in a 5×4 grid for carried items
- **Slotless Items** — A separate section for items that don't occupy body slots
- **Character Stats** — Name, AC, HP, and current equipment bonuses

Press **I** again or **Esc** to close the panel.

Equipment Slots

Your character has **14 body equipment slots**, following the D&D 3.5e standard:

Slot	What Goes Here	Notes
Head	Helmets, headbands, circlets	Headband of Intellect, Helm of Brilliance
Face/Eyes	Goggles, lenses, masks	Eyes of the Eagle, Goggles of Night
Neck	Amulets, necklaces, periapts	Amulet of Natural Armor, Periapt of Wisdom
Torso	Vests, shirts, robes	Vest of Resistance, Monk's Belt
Armor	Armor and robes	Chain Shirt, Full Plate, Bracers of Armor
Waist	Belts, girdles	Belt of Giant Strength, Girdle of Femininity
Back	Cloaks, capes, mantles	Cloak of Resistance, Wings of Flying
Wrists	Bracers, bracelets	Bracers of Archery, Shackles of Compliance
Hands	Gloves, gauntlets	Gloves of Dexterity, Gauntlets of Ogre Power
Left Ring	Ring	One of your two ring slots
Right Ring	Ring	One of your two ring slots
Feet	Boots, sandals, slippers	Boots of Speed, Slippers of Spider Climbing
Left Hand	Weapon, shield, rod	Off-hand items
Right Hand	Weapon, shield, rod	Main-hand items

Equipping & Unequipping Items

To equip an item:

1. **Click** the item in your General Inventory — it becomes highlighted/selected
2. **Click** the appropriate Equipment Slot — the item moves into that slot
3. If the slot is already occupied, the items **swap** automatically

To unequip an item:

- **Click** an occupied Equipment Slot — the item returns to the first empty General Inventory slot

To use a consumable:

- **Click** the consumable once to select it, then **click it again** to use it

To drop an item:

- **Right-click** an item in General Inventory → select **“Drop”** from the context menu

 **Two-Handed Weapons:** Equipping a two-handed weapon (greatsword, greataxe, longbow, etc.) automatically unequips whatever is in your off-hand slot. The displaced item returns to your General Inventory.

Slotless Items

Some wondrous items don't occupy a body slot — **Iron Stones, Bags of Holding**, and similar items. These use the **Slotless** equipment category.

- You can have up to **10 slotless items** equipped simultaneously
- Slotless items appear in their own section of the Inventory panel
- Equipping/unequipping slotless items works the same as regular equipment
- Passive bonuses from slotless items apply automatically when equipped

Pre-Combat Inventory Management

Before combat begins, you can access the **Pre-Combat Inventory UI** which offers additional features:

- **Stash Browsing** — Browse and transfer items from the party stash
- **Character Selection** — Switch between party members to manage their gear
- **Drag-and-Drop** — Drag items between characters or to/from the stash
- **Right-Click Quick Actions** — Fast equip, transfer, or examine items
- **Validation Feedback** — The UI warns you about invalid equipment combinations

Item Quality & Color Coding

Items in your inventory are color-coded by quality:

Color	Quality	Meaning
 White	Standard	Normal, non-magical equipment
 Blue	Masterwork	+1 attack (weapons) or –1 ACP (armor)
 Purple	Special Material	Mithral, Adamantine, Cold Iron, etc.
 Gold	Magical	Enchanted with a magic enhancement bonus

Stack counts appear as  for stackable items (arrows, bolts). **Charge counts** display as  for wands and similar items. Ammunition quantities show the current count.

Rings

The Two-Ring Rule

Per D&D 3.5e rules, a character may wear **at most two magic rings** at one time — one on each hand (**Left Ring** and **Right Ring** slots). This limit is hard-coded and cannot be bypassed.

If both ring slots are full and you want to equip a new ring, you must first unequip one of your current rings.

Passive Rings

Many rings provide constant bonuses simply by being worn:

Ring	Effect
Ring of Protection +1/+2/+3/+4/+5	Deflection bonus to AC
Ring of Sustenance	No need for food/water; 2-hour sleep
Ring of Swimming	+5 competence bonus to Swim
Ring of Climbing	+5 competence bonus to Climb
Ring of Jumping	+5 competence bonus to Jump
Ring of Feather Falling	Constant feather fall effect
Ring of Mind Shielding	Immune to detect thoughts, discern lies
Ring of Counterspells	Auto-counterspell one stored spell
Ring of Freedom of Movement	Continuous freedom of movement
Ring of Evasion	Evasion ability (as rogue)
Ring of Force Shield	+2 shield bonus to AC (no ACP)

Deflection bonus stacking: If you wear two Rings of Protection, only the **highest bonus** applies (they don't stack). This follows D&D 3.5e's "same type doesn't stack" rule.

Active Rings

Some rings have abilities you activate during your turn. These cost an action and may have daily/weekly limits:

Ring	Activation	Limit	Effect
Ring of Invisibility	Command word	At will	Invisibility on self
Ring of Blinking	Command word	At will	Blink effect
Ring of Telekinesis	Command word	At will	Telekinesis (up to 5 lbs/level)
Ring of Animal Friendship	Standard action	1/day	Charm animal (Will DC 17)
Ring of the Ram	Standard action	Charged	Force ram (1–3 charges per use)
Ring of X-Ray Vision	Standard action	Per-rest	See through walls (Con damage risk)
Ring of Shooting Stars	Varies	Daily	Ball lightning, faerie fire, spark shower
Ring of Spell Turning	Automatic	Charged	Reflects 1d4+6 spell levels (on equip)
Ring of Djinni Calling	Standard action	1/day	Summon djinni servant

Multi-ability rings (like Ring of Shooting Stars) present a **selection panel** when activated — choose which ability to use from the list.

Charge-Based Rings

Some rings use a **charge pool** instead of daily uses:

- **Ring of the Ram:** 50 charges total. Each use costs 1–3 charges (more charges = more damage). Regenerates **1d10 charges per day** on rest.
- **Ring of Spell Turning:** Absorbs 1d4+6 spell levels when first equipped. Does **not** regenerate — once spent, the pool is empty until re-equipped.

Charge pools display in the item tooltip. Monitor your charges carefully!

Ring Use Tracking & Resting

- **Daily uses** reset when you rest
 - **Weekly uses** reset every 7 rests
 - **Charge regeneration** occurs on rest (Ring of the Ram: 1d10/day)
 - **X-Ray Vision** uses are tracked per rest; excessive use causes Constitution damage
-

Rods

Rods are held items — they occupy a **hand slot** (Left Hand or Right Hand), not a worn slot. You must be holding a rod to use it.

Metamagic Rods

The most common rods are **Metamagic Rods**, which let you apply metamagic effects to your spells **without increasing the spell slot level**. This is enormously powerful for spellcasters.

There are **21 metamagic rods** — 7 metamagic types × 3 power levels:

Metamagic Type	Effect on Spell
Empower	Variable numeric effects increased by 50%
Enlarge	Range doubled
Extend	Duration doubled
Maximize	All variable numeric effects at maximum value
Quicken	Cast as a free action instead of standard
Silent	Cast without verbal components
Still	Cast without somatic components

Using a Metamagic Rod Step-by-Step

1. **Equip the rod** in a hand slot (Left or Right Hand)
2. **Begin casting a spell** normally during your turn
3. When prompted, **select the metamagic rod** to apply its effect
4. The system validates the spell level against the rod's maximum
5. If valid, the metamagic is applied with **zero slot increase**
6. The rod consumes **1 daily use** (standard: 3 uses/day)

 **Key Benefit:** Normally, applying Empower to a 3rd-level spell would require a 5th-level slot (+2 levels). With a rod, it still uses a 3rd-level slot!

Rod Power Levels

Each metamagic rod comes in three power levels that determine the **maximum base spell level** it can affect:

Power Level	Max Spell Level	Example
Lesser	3rd level	Lesser Rod of Empower: works on spells level 1–3
Normal	6th level	Rod of Empower: works on spells level 1–6
Greater	9th level	Greater Rod of Empower: works on any spell

All metamagic rods have **3 uses per day** by default. Daily uses reset at dawn (on rest).

Combat & Utility Rods

Beyond metamagic, several rods have direct combat or utility functions:

Rod	Category	Effect
Rod of Absorption	Combat	Absorb spells, convert to own casting
Rod of Cancellation	Combat	Permanently drain a magic item's enchantment
Rod of Enemy Detection	Utility	Detect nearest enemies (60 ft)
Rod of Flailing	Combat	+3 flail, auto-Two-Weapon Fighting
Rod of Lordly Might	Legendary	Transforms into 6 different weapons; multiple powers
Rod of Negation	Combat	Negate another rod's power
Rod of Wonder	Utility	Random magical effect each use

Legendary Rods

Three rods are classified as **Legendary** — exceptionally powerful artifacts:

- **Rod of Lordly Might** — Morphing weapon with 6 forms (battleaxe, flaming lance, climbing pole, etc.)
 - **Rod of Absorption** — Absorb incoming spells and convert their energy to fuel your own casting
 - **Rod of Security** — Create an extradimensional safe haven
-

Staves

Staves are powerful spellcasting tools that contain **multiple spells** and use a **shared charge pool**. Each staff starts with **50 charges** and cannot be recharged in the current implementation (per core DMG 3.5e).

Activating a Staff

To cast a spell from a staff, you must meet **one** of these requirements:

1. **Class Match** — The spell appears on your class's spell list (Wizard, Cleric, Druid, etc.)
2. **Magic Domain** — You're a Cleric with the Magic Domain (grants access to all staff spells)
3. **Use Magic Device** — Make a UMD check (DC 20) to activate the staff regardless of class

Staves use **Spell Trigger** activation — no material components or focuses needed.

The Spell Selection Panel

When you activate a staff during combat:

1. The **Spell Selection Panel** opens, showing all spells stored in the staff
2. Each spell displays:
 - **Spell name and level**
 - **Charge cost** (varies by spell — higher-level spells cost more charges)
 - **Caster Level (CL)** — the staff's built-in caster level
 - **Save DC** — calculated as $10 + \text{spell level} + (\text{spell level} \div 2)$
3. Spells with **insufficient charges** are **grayed out** and unselectable
4. **Click** the spell you want to cast

Example — Staff of Fire (CL 8, 50 charges):

- Burning Hands (1st) — 1 charge
- Fireball (3rd) — 1 charge
- Wall of Fire (4th) — 1 charge

Charges & Expended Staves

- Staves start with **50 charges maximum**
- Each spell cast consumes charges (shown in the selection panel)
- Current charges display in the item tooltip as `charges: n/50`
- When a staff reaches **0 charges**, it becomes **expended** and reverts to a **non-magical quarter-staff**
- **Charges cannot be restored** in the current implementation

 **Budget your charges carefully!** A Staff of Power with 50 charges might seem generous, but casting its high-level spells can drain it quickly.

Use Magic Device Fallback

If your character doesn't have the matching class for a staff's spells:

1. Attempt to activate the staff
2. The system automatically checks for **Use Magic Device** skill
3. A **DC 20 check** is rolled: $d20 + \text{UMD skill bonus} \geq 20$
4. On success, the staff activates normally for this use

5. On failure, you've wasted your action — try again next turn

Metamagic System

Metamagic Feats Overview

The prototype implements all **9 metamagic feats** from the PHB:

Feat	Slot Increase	Effect
Empower Spell	+2	Variable numeric effects ×1.5
Enlarge Spell	+1	Double the spell's range
Extend Spell	+1	Double the spell's duration
Heighten Spell	Variable	Increase spell's effective level (for DC)
Maximize Spell	+3	All variable numeric effects at maximum
Quicken Spell	+4	Cast as free action (1 quickened spell/round)
Silent Spell	+1	Remove verbal component
Still Spell	+1	Remove somatic component
Widen Spell	+3	Double the spell's area

Applicability restrictions:

- **Empower/Maximize** — Only work on spells with numeric effects (damage/healing)
- **Enlarge** — Only works on spells with range > 0 (not Touch or Personal)
- **Extend** — Doesn't apply to Instantaneous, Permanent, or Concentration durations
- **Widen** — Only works on spells with an area of effect
- **Heighten** — You choose the new level; DC adjusts accordingly

Prepared vs. Spontaneous Casters

The metamagic workflow differs based on your casting type:

Prepared Casters (Wizard, Cleric, Druid, Paladin, Ranger)

- Metamagic is chosen **during spell preparation** (before combat)
- The modified spell occupies a **higher-level slot** (base level + slot increase)
- **No casting time change** — still cast as the spell's normal casting time
- Example: Empowered Fireball (3rd + 2 = **5th-level slot**)

Spontaneous Casters (Sorcerer, Bard)

- Metamagic is applied **at casting time**

- The spell uses a **higher-level slot** (same as prepared)
- Casting time changes to **full-round action** (instead of standard action)
- **Exception:** Quicken Spell always makes the spell a **free action**

Rod-Assisted Metamagic (No Slot Increase)

When you use a **Metamagic Rod** to apply a feat:

- The metamagic effect is applied normally
- **The spell slot level does NOT increase** — this is the rod’s major benefit
- Rod-sourced metamagic is tracked separately from feat-sourced metamagic
- You can combine a rod metamagic with a feat metamagic on the same spell
- The effective spell level cap of **9th level** still applies to the total

 **Power Combo:** Use a Rod of Quicken on a Fireball — it becomes a free-action Fireball using only a 3rd-level slot!

Stacking Metamagic

You can apply **multiple metamagic effects** to a single spell:

- Each metamagic feat can only be applied **once** per spell (no stacking the same feat)
- Slot increases from feats are **additive**: Empowered + Extended Fireball = 3 + 2 + 1 = **6th-level slot**
- Rod-sourced metamagic contributes **zero** to the slot increase
- The total effective spell level (after all adjustments) **cannot exceed 9th level**
- If a combination would exceed 9th level, the system rejects it with an error message

Wondrous Items

Wondrous Items are the largest and most diverse magic item category, spanning everything from stat-boosting headbands to flying carpets.

Activation Types

Every wondrous item has one of four activation types:

Type	How It Works	Player Action
Passive	Always active when equipped	None — equip and forget
Continuous	Constant ongoing effect	None — always on while worn
Command Word	Speak a word to activate	Click item → speak command
Use-Activated	Physical interaction triggers it	Click item → use it

Passive & Continuous Items

These items work automatically once equipped:

Ability Score Boosters:

- Headband of Intellect (+2/+4/+6 Int)
- Amulet of Health (+2/+4/+6 Con)
- Gloves of Dexterity (+2/+4/+6 Dex)
- Belt of Giant Strength (+4/+6 Str)
- Periapt of Wisdom (+2/+4/+6 Wis)
- Cloak of Charisma (+2/+4/+6 Cha)

Armor Class:

- Bracers of Armor +1 through +8
- Amulet of Natural Armor +1 through +5
- Dusty Rose Ioun Stone (+1 insight AC)

Movement:

- Boots of Striding and Springing (+10 ft speed, +5 Jump)
- Winged Boots (fly 60 ft, 3×/day)
- Slippers of Spider Climbing (spider climb at will)
- Carpet of Flying (fly at various speeds based on size)

Storage:

- Bag of Holding (Type I-IV, various weight/volume capacities)
- Handy Haversack (retrieval as free action)
- Portable Hole (extradimensional 6 ft × 10 ft space)

Command Word Items

Command word items require you to **activate them** during your turn:

- **Boots of Speed** — Grants haste for up to **10 rounds/day** (rounds don't need to be consecutive)
- +1 dodge AC, +1 attack bonus, +30 ft speed, extra attack
- Rounds tick down at the start of each of your turns while active
- **Horn of Valhalla** — Summon barbarian warriors (1×/week, varies by horn type)
- **Figurines of Wondrous Power** — Summon an animal companion (weekly/monthly limits)

Use-Activated Items

These items activate through physical use or interaction:

- **Apparatus of Kwalish** — Operate levers to control the iron lobster vehicle
- **Elemental Gems** — Crush to summon a Large elemental (single use)
- **Bag of Tricks** — Pull out a fuzzy ball that becomes a random animal

Consumable Items

Some wondrous items are **single-use** (marked internally with `usesPerDay = -1`):

Item	Effect
Bead of Force	Throw to create a 10 ft resilient sphere (5d6 damage)
Elemental Gem (4 types)	Crush to summon Large Air/Earth/Fire/Water Elemental
Necklace of Fireballs (beads)	Detach and throw beads for fireball effects
Dust of Disappearance	Sprinkle on self for greater invisibility (2d6 rounds)
Dust of Dryness	Absorbs water or creates a water geyser

Once used, consumable items are **permanently expended**.

Summoning Items

Several wondrous items can **summon creatures** to fight alongside you:

Item	Creature	Duration	Limit	Mountable?
Figurine: Bronze Griffon	Griffon	6 hours	1×/week	✓ Yes
Figurine: Ebony Fly	Giant fly	12 hours	3×/week	✓ Yes
Figurine: Golden Lions	2 Lions	1 hour	1×/week	✗ No
Figurine: Ivory Goats	Varies	Varies	1×/month	✓ (travel)
Figurine: Marble Elephant	Elephant	24 hours	1×/month	✓ Yes
Figurine: Obsidian Steed	Nightmare	24 hours	1×/week	✓ Yes
Figurine: Onyx Dog	Dog	6 hours	1×/week	✗ No
Figurine: Serpentine Owl	Owl/Giant Owl	8 hours	1×/week	✓ (giant)
Figurine: Silver Raven	Raven	24 hours	At will	✗ No
Bag of Tricks	Random animal	10 min	Unlimited	✗ No
Elemental Gem	Large Elemental	1 round/lvl	Single use	✗ No

Summoned creatures act as allies under your control. Mountable creatures can carry you, replacing your movement speed with theirs.

Spell-Like Ability Items

Some wondrous items grant spell-like abilities with their own daily use limits:

- Abilities are listed in the item tooltip with remaining uses
- Uses per day track individually (e.g., “Teleport 1/day” and “Plane Shift 1/day” are separate)
- Uses display as a comma-separated count in the tooltip
- All spell-like ability uses reset on rest

Daily, Weekly & Monthly Limits

Wondrous items use three tiers of use-limit tracking:

Reset Period	When It Resets	Examples
Daily	After any rest	Boots of Speed (10 rounds), most command word items
Weekly	Every 7 rests	Figurines of Wondrous Power, Cubic Gate sides
Monthly	Every 30 rests	Ivory Goats, Marble Elephant

⚠ **Rest is required** to reset uses. Daily uses don't reset on their own — you must actually take a rest through the game's rest mechanic.

Specific Magic Items

How Specific Items Work

Specific Magic Items are unique named items from the DMG with **custom behavior scripts** that trigger automatically during combat. Unlike generic +1/+2 weapons, these items have special abilities that activate based on game events.

Each specific item has a **Behavior** system that hooks into:

- **OnEquip / OnUnequip** — Setup or tear down when the item is worn
- **Attack Rolls** — Modify attack bonus against certain targets
- **Damage Rolls** — Add bonus damage, change damage type, or trigger effects
- **On Hit** — Trigger effects when you successfully hit (life drain, smiting, etc.)
- **On Critical** — Special effects on critical hits (instakill, level drain, etc.)
- **Defensive** — Modify AC, grant resistances, or reflect attacks
- **Round/Turn Start** — Per-round effects (aura, regeneration, etc.)

Notable Weapons

🗡 Holy Avenger

+2 cold iron longsword (becomes +5 in paladin hands)

Condition	Bonus
Non-paladin	+2 enhancement, +2d6 holy damage vs evil
Paladin	+5 enhancement, +2d6 holy vs evil, SR (5 + paladin level) in 5 ft aura, greater dispel magic 1/round free action

The Holy Avenger is the ultimate paladin weapon. Its SR aura protects nearby allies too!

🏹 Oathbow

+2 composite longbow (+2 Str)

- **Once per day**, declare a **sworn enemy** (speak the oath)

- Against the sworn enemy: enhancement becomes **+5**, deal **+2d6 bonus damage** per hit
- Against all others while oath is active: the bow functions as **masterwork only** with a **–1 penalty**
- The oath persists until the enemy is slain (or 7 days pass)
- Only **one sworn enemy** at a time — you can't re-oath until the current one resolves

 **Tactical tip:** Declare your oath against the toughest enemy in a fight to maximize the +5/+2d6 bonus, but be aware of the penalties against everyone else!

Other Notable Weapons

Weapon	Key Mechanic
Frost Brand	+3 cold damage, extinguish fires, cold resistance 10, anti-fire-creature bonuses
Sun Blade	+2 bastard sword / +4 vs undead, usable as short sword, daylight on command
Dwarven Thrower	+2 warhammer / +3 thrown (returning), +2d8 vs giants (dwarf only)
Luck Blade	+2 short sword, +1 luck to saves, 1d4-1 wishes
Nine Lives Stealer	+2 longsword, instakill on crit (Fort DC 20 or die), 9 charges
Sword of the Planes	+1 longsword, +2 on Astral/+3 on other planes
Sword of Life Stealing	+2 longsword, 1d6 negative energy on crit (heals wielder)
Mace of Smiting	+3 heavy mace, +5 vs constructs, instakill constructs on crit
Mace of Terror	+2 heavy mace, fear aura 3/day (Will DC 16, 30 ft cone)
Rapier of Puncturing	+2 rapier, 1d6 Con damage on crit (Fort DC 17 negates)
Sylvan Scimitar	+3 scimitar in forests, druid-enhanced, entangle on crit
Shatterspike	+1 longsword, sunder bonus +4, auto-destroy items hardness ≤ 10
Javelin of Lightning	5d6 lightning bolt on throw (single use per throw, reforms)
Slaying Arrow	Instakill designated creature type (Fort DC 20 or die)
Sleep Arrow	Sleep effect on hit (Will DC 11 or unconscious 1d3 minutes)

Notable Armor & Shields

Armor/Shield	Key Mechanic
Mithral Full Plate of Speed	+1 full plate (max dex +3, ACP –3), haste 10 rounds/day
Demon Armor	+4 full plate, claw attacks 1d10+1, negative energy contagion
Breastplate of Command	+2 breastplate, +2 Charisma for leadership, command 1/day
Armor of Rage	+1 breastplate, rage 1/day (as barbarian), –2 AC during rage
Banded Mail of Luck	+3 banded mail, force reroll 1 attack/day
Animated Shield	+2 shield that floats and defends on its own (free both hands)
Absorbing Shield	+1 heavy shield, disintegrate touch 1/day, absorb disintegrate
Lion's Shield	+2 heavy shield, lion bite 2d6 3/day
Winged Shield	+3 heavy shield, fly 1/day (5 minutes)
Caster's Shield	+1 light shield, stores one spell (up to 3rd level)
Spellguard Shield	+1 light shield, +2 bonus to saves vs spells

Special Systems

Apparatus of Kwalish

The **Apparatus of Kwalish** is a Large iron vehicle shaped like a lobster, operated by **10 levers** from inside. It holds **2 Medium creatures**, has **AC 20, HP 200, Hardness 10**, and a sealed air supply lasting **10 hours**.

Lever Controls

Lever	Up Position	Down Position
1	Legs/tentacles extend — walk 10 ft/round	Retract legs
2	Forward window unshutters	Forward window shutters
3	Side windows unshutter (2)	Side windows shutter
4	Open pincers extend — pincer attack +10, 2d6	Pincers retract
5	Open forward hatch	Close forward hatch
6	Slow swim forward — 30 ft/round	Slow swim backward — 30 ft/round
7	Fast swim forward — 200 ft/round	Turn left 90°
8	Antenna light (30 ft radius)	Antenna light off
9	—	Turn right 90°
10	—	Descend 200 ft/round (underwater)

 **Air Supply:** When the apparatus is sealed (hatches closed), the air supply lasts 10 hours for 2 occupants. Monitor this in extended underwater expeditions!

Construct Guardians

Two items create autonomous **construct companions** that can guard areas, patrol, and fight:

Iron Cobra

- **Type:** Tiny construct · **AC 20** · **HP 30** · Fast Healing 3
- **Attack:** Bite +10, 1d3 + poison (Fort DC 16, 1d6 Con damage)
- **Behavior:** Autonomous AI — patrols a 30 ft guard radius
- Detects hidden enemies
- Attacks intruders automatically
- Returns to patrol when threats are eliminated
- **Activation:** Command word (deploy/recall)
- **Cost:** 80,000 gp

Stone Horse

Two variants are available:

Variant	Speed	AC	HP	Str	Best For
Courser (10,000 gp)	50 ft	14	30	16	Fast travel, pursuit
Destrier (14,800 gp)	40 ft	16	45	20	Combat mount, durability

- Activates on command word (stone statuette → living horse)
- **Construct traits:** Does not eat, sleep, or tire
- Functions as a combat mount — grants rider its movement speed
- Reverts to stone on command or when reduced to 0 HP

Planar Travel

The prototype implements a full **Planar Travel System** supporting **26 planes of existence** from the DMG:

The Planes

Category	Planes
Material	Material Plane
Transitive	Astral, Ethereal, Shadow
Inner (Elemental)	Air, Earth, Fire, Water
Inner (Energy)	Positive Energy, Negative Energy
Outer (Good)	Mount Celestia, Bytopia, Arcadia, Elysium, Beastlands, Arborea
Outer (Neutral)	Mechanus, Acheron, Outlands, Limbo
Outer (Evil)	Nine Hells, Gehenna, Gray Waste, Abyss, Carceri, Pandemonium

Each plane has unique **environmental effects** including:

- **Gravity** — Normal, Heavy, Light, None, or Subjective Directional
- **Time Flow** — Normal, accelerated, or decelerated relative to Material Plane
- **Elemental/Energy Traits** — Automatic damage, healing, or transformative effects
- **Alignment Traits** — Bonuses or penalties based on your alignment

Items that interact with the Planar Travel system include Plane Shift spells, the Cubic Gate, and the Amulet of the Planes.

Cubic Gate

The **Cubic Gate** is a Major Wondrous Item — a small cube with each of its **6 faces** attuned to a different plane.

- **Activation:** Turn the cube to the desired face and activate
- **Effect:** Opens a gate to the attuned plane
- **Limit:** Each face can be used **3 times per week** (tracked individually)
- **Weekly Reset:** Face uses reset every 7 rests

The 6 planes are assigned when the item is created and displayed in the tooltip. Choose your face carefully — once a gate opens, planar environmental effects apply!

Quick Reference

Hotkeys & Shortcuts

Key	Action	Context
I	Toggle Inventory panel	During your active turn
C	Toggle Character Sheet	Any time
K	Toggle Skills panel	Any time
Esc	Close current panel / Cancel	Any panel open
Enter	Confirm action / Loot all	Loot collection UI
1-9	Select numbered option	Bull rush push distance; numbered actions
+/=	Zoom camera in	Exploration / Combat
–	Zoom camera out	Exploration / Combat
R	Reset camera	Exploration / Combat

F12	Toggle Spell Testing panel	Debug/testing mode

Inventory Interactions Summary

Action	How
Equip item	Click item in inventory → click equipment slot
Unequip item	Click occupied equipment slot
Swap items	Click item in inventory → click occupied slot (auto-swaps)
Use consumable	Click consumable twice (select → use)
Drop item	Right-click item → “Drop”
Activate ring	Equip ring → use ring ability from action menu
Activate wondrous item	Equip item → use from action menu (Command Word / Use-Activated only)
Cast from staff	Equip staff → activate → select spell from panel
Apply metamagic rod	Hold rod in hand → cast spell → select rod when prompted

Bonus Stacking Rules

The game enforces **D&D 3.5e stacking rules** — bonuses of the same type do **not** stack (highest wins):

Bonus Type	Example Sources	Stacks?
Enhancement	+1 Sword, +2 Sword	✗ Highest only
Deflection	Ring of Protection +1, +3	✗ Highest only
Natural Armor	Amulet of Natural Armor +2, +4	✗ Highest only
Armor	Bracers of Armor +3, +5	✗ Highest only
Shield	Shield +1, Shield +2	✗ Highest only
Resistance	Cloak of Resistance +2, +3	✗ Highest only
Dodge	Various dodge sources	✓ All stack
Circumstance	Various circumstance bonuses	✓ All stack
Untyped	loun stones, misc effects	✓ All stack

Troubleshooting

“I can’t equip this item”

- **Check the slot:** The item may require a specific slot. Hover over it to see which slot it needs.
- **Slot occupied:** If the target slot has an item, equipping will swap them. Make sure you have room in General Inventory for the swap.
- **Ring limit:** You can only wear 2 rings. Unequip one first.
- **Slotless limit:** Maximum 10 slotless items. Unequip one first.
- **Two-handed conflict:** A two-handed weapon needs both hands. Unequip your off-hand item first, or let the auto-swap handle it.

“My staff won’t activate”

- **Wrong class:** Your character’s class must match one of the staff’s spell classes. Try Use Magic Device (DC 20) if you have the skill.
- **No charges:** The staff may be expended (0 charges). Check the tooltip for remaining charges. An expended staff is just a quarterstaff.
- **Not equipped:** The staff must be in a hand slot (Left or Right Hand).

“My metamagic rod isn’t working”

- **Spell too high level:** Check the rod’s power level — Lesser (≤ 3 rd), Normal (≤ 6 th), Greater (≤ 9 th).
- **Out of daily uses:** Metamagic rods have 3 uses/day. Rest to reset.
- **Rod not held:** The rod must be in a hand slot, not just in inventory.
- **Cap exceeded:** The total effective spell level (base + feat metamagic) can’t exceed 9th level.

“My ring ability won’t activate”

- **Out of daily/weekly uses:** Check your ring’s remaining uses in the tooltip. Rest to reset daily uses.

- **Out of charges:** Charge-based rings (Ring of the Ram) have finite charges. Check remaining charges.
- **Action economy:** Some ring abilities require a standard action. Make sure you haven't used your action this turn.

“My wondrous item doesn't seem to do anything”

- **Passive/Continuous items** work automatically — there's nothing to “activate.” Check your character sheet for the stat bonuses.
- **Daily uses spent:** Command Word and Use-Activated items may have daily limits. Rest to reset.
- **Wrong activation type:** Make sure you're using the right method (Command Word requires speaking; Use-Activated requires physical interaction).

“My bonuses aren't stacking”

- This is usually correct! D&D 3.5e's stacking rules mean same-type bonuses don't add together. Wearing two Rings of Protection gives you only the **higher** bonus.
- **Dodge and untyped bonuses** are the exceptions — these always stack.
- Check the character sheet to see your total calculated bonuses.

“My character's stats changed unexpectedly”

- Stats recalculate automatically every time you equip or unequip an item
- **Armor properties** (Max Dex Bonus, Armor Check Penalty, Arcane Spell Failure) are recalculated accounting for masterwork quality and special materials (mithral, adamantite)
- **Encumbrance** from carried weight can affect movement speed and impose additional ACP

This guide covers the magic item systems as implemented in the current prototype build. For rules questions not covered here, refer to the D&D 3.5e Player's Handbook (Chapter 7) and Dungeon Master's Guide (Chapter 7-8).
